

1. Promote and enhance awareness and advocacy of Conservation Agriculture (CA)
 - Intensify efforts to advocate for and promote the benefits of Conservation Agriculture globally, particularly in the regions with low adoption rates.
 - Actively lobby for integrating CA practices into agricultural policies at both local and national levels worldwide.
2. Increase financial investment, funding, and market opportunities for CA through appropriate partnerships, mechanisms, and incentives while providing decent jobs and empowering women and youth.
3. Recognise, respect and use farmers as key drivers and innovators of CA
 - Harness and support a farmer-centered CA Innovation Systems approach to increase learning, adaptation, and adoption.\
4. Increase support for small-scale farmers
 - Prioritize promoting sustainable agricultural mechanisation, developing affordable machinery, and establishing comprehensive support plans, including funding and maintenance, to foster sustainable CA adoption among small-scale farmers with sustainable mechanisation service providers.
5. Promote accessible practical literature, extension and rural advisory services
 - Renew initiatives to create practical literature on CA, share knowledge and experience, and showcase its feasibility across various systems and regions for easy public access.
6. Increase Public education/awareness of CA benefits
 - Provide clear and precise information about Conservation Agriculture to enhance public understanding of its positive impacts on food security.
7. Establish a CA Hall of Fame to reward CA practitioners
 - Revisit the 8th World Congress on Conservation Agriculture (WCCA) proposal to create a CA Hall of Fame and a directory of specialists/scientists and practitioners to facilitate access to valuable knowledge.
8. Enhance Research and Development
 - Expand the capabilities of researchers and scientists to conduct studies on CA and effectively disseminate findings to the agricultural industry.
